Objection – Premises Licence Application No. 887243 (516 Old Kent Road – First Floor)

Name: [REDACTED]

Address: [REDACTED]

Email: [REDACTED]

Resident Impact Statement

I have lived directly opposite this premises for nearly a decade. During previous operation under the same ownership, I repeatedly witnessed violence, drug use, excessive noise, and both sexual and non-sexual antisocial behaviour. The pattern was persistent and deeply disruptive.

It is extremely concerning that we are again being asked to respond to yet another licence application of the same nature, from the same operator, at the same address—despite multiple past refusals and a long, documented history of serious problems. This is an unsuitable location for any late-night, alcohol-led venue, and past management has consistently demonstrated an inability to control noise, crowds, or disorder.

My neighbours and I remain firmly opposed to a return of late-night activity at this address. We have already endured years of unacceptable disturbance and risk to our wellbeing. Nothing in this application suggests any meaningful change, and granting this licence would inevitably recreate the same issues.

COMMUNITY RESPONSE

Objection – Application for Premises Licence No. 887243

Dear Southwark Licensing,

We as local residents collectively object to the stated premises licence application. The application remains incompatible with the Licensing Objectives and with the Council's Licensing Policy, especially given the vulnerability of residents directly opposite and the long, documented history of problems connected to both the premises and the operator involved.

1. Safeguarding risks to vulnerable residents directly opposite the premises
The venue sits directly opposite multiple residential blocks, including John Penry House, which provides accommodation for older and vulnerable adults. Residents there require consistent and predictable night-time conditions. The application seeks a closing time that reaches into the early hours, including on working days. Alcohol-led activity, late dispersal, noise and increased footfall at those hours are directly at odds with the needs of a residential and vulnerable population.

Southwark has safeguarding responsibilities toward residents in supported accommodation. Approving a late-night alcohol and entertainment licence at this location would introduce foreseeable risks to wellbeing, sleep, and personal safety.

2. The surrounding community includes families, children, carers and shift workers. Directly opposite and around the premises are high-density residential blocks with:

- families with young children
 - early-start workers
 - elderly residents
 - individuals previously affected by noise and nuisance from this address
- Children use nearby bus stops early in the morning. Very late-night alcohol-led dispersal increases the likelihood of noise, litter and disturbance only hours before school and work traffic begins. The character of the area is residential and sensitive. The presence of shops or restaurants on the main road is not comparable. Ordinary businesses do not generate hundreds of people leaving a late-night venue, with associated alcohol use, drug use and disorder.

3. The premises and the operator have a documented history of serious issues at this address

Southwark's Licensing Policy states that the past compliance history of both the premises and the management is relevant to decision-making. Both matter here. This premises has previously been associated with:

- repeated licensing interventions
- suspensions
- noise problems
- serious disorder
- and licence revocation

These were not isolated events but long-running issues that required formal action. The current applicant company's director, Mr. Eric Doe, previously operated premises at this same address during periods when these problems occurred. This raises concerns about continuity of management. The application does not demonstrate any change in approach, structure or oversight that would reduce risk. A return to late-night operation under the same individual increases the likelihood of repeated harm.

The applicant's own submitted conditions include a provision stating that "Mr. Eric Doe... shall have no involvement in the operation of the premises whatsoever and shall be permanently excluded from the premises." The contradiction is clear: the director of the applicant company is the same individual the submitted conditions state must be excluded. This raises concerns about accuracy, credibility and workability, and shows that the operating schedule has not been properly reviewed or tailored to this application.

4. The operating model indicates nightclub-style activity, not a restaurant. Although described as a "restaurant and lounge," the operating schedule requests:

- alcohol service until 03:00
- closing at 03:30
- amplified and recorded music
- SIA door supervisors
- body-worn cameras
- off-sales

- large private events

These are features of an alcohol-led late-night venue, not a food-led premises. Previous operators at this address used similar descriptions but operated as nightclubs. The Committee should consider the realistic use of the premises based on the hours and conditions requested.

5. The location is structurally unsuitable for late-night dispersal

The entrance directly faces homes. There is no buffer zone, no set-back and no safe dispersal route. Patrons inevitably spill into residential walkways, bus stops and the entrances of neighbouring blocks.

Late-night taxis, smoking areas, queues, noise breakout and groups congregating outside are unavoidable outcomes of the hours sought. Food vendors regularly appear to serve intoxicated patrons and end up operating outside residential buildings. The physical layout and proximity to homes make this site unsuitable for late-night operation, regardless of conditions offered.

6. Enforcement difficulties have occurred at this address previously

Council teams have had to intervene repeatedly at this premises. There were occasions where engagement with management was challenging during late-night operation, and Southwark's noise team reported feeling unsafe entering the venue to investigate complaints. This raises concerns about enforceability and cooperation if a similar operating model returns.

Licences can only be granted where conditions are realistically enforceable. Given the history at this address, that threshold has not been met.

7. Residents want well-run local businesses — but not these hours at this site

Residents are not opposed to restaurants, hospitality or cultural activity. A food-led venue closing around 22:30–23:00 would be consistent with the area and would not attract strong objection. The issues relate specifically to:

- the very late hours
- the alcohol-led model
- the history of crime and disorder
- the continuity of the operator
- and the vulnerability of nearby residents

8. Noise levels cannot be mitigated due to proximity to homes

Previous operators attempted different measures to reduce noise breakout, including makeshift window coverings and temporary insulation. None were effective. The building's structure and its proximity to residential windows make noise control impossible.

Bass vibration, crowd noise, door activity, taxi engines and groups gathering outside carry directly into homes opposite. The physical design and location of the premises make disturbance unavoidable at the hours requested.

9. The venue has previously attracted serious crime, not minor incidents

This address has repeatedly drawn police involvement for violence, disorder and safeguarding concerns. Residents have raised these issues for years. Incidents have included:

- serious assaults
- incidents involving weapons

- drug activity
- and sexual assaults

Residents have repeatedly warned that late-night operation at this premises puts people at risk. The recurring pattern raises a clear question: how many more interventions, violent incidents and endangered residents are required before it is accepted that late-night licensing at this address does not work?

Request to the Committee

For the reasons above – safeguarding risks, residential vulnerability, the track record of both the premises and operator, the alcohol-led operating model, dispersal and enforcement concerns, structural noise issues, the history of serious crime and Southwark’s licensing policy – the application should be refused.

If any licence is granted, the hours should be significantly reduced and aligned with the needs of the local community.

Objection – Premises Licence Application No. 887243 (516 Old Kent Road – First Floor)

Name: [REDACTED]

Address: [REDACTED]

Email: [REDACTED]

Personal Resident Impact Statement

- My apartment faces onto Old Kent Road and when I previously lived in the property, during the years I was there I was severely impacted by the noise caused by the late-night operations of clubs / event venues at this address. Working a high-stress, long hours city job, the ongoing disturbances impacted my sleep to the point it impacted my ability to perform.
- This, combined with the fact that as a single woman I felt unsafe walking home alone and had been harassed outside the property by drunk male club-goers on more than one occasion, fundamentally resulted in my decision to move out of the property I purchased to live elsewhere.
- While the property has been tenanted, when the venue was operating as a club, I received complaints from tenants. In the time that the venue has not been occupied for this purpose, things have been fine and the tenants have been content.
- I hope to move back to Southwark in the near future - but the fact these applications keep being considered continues to deter me from doing so.

COMMUNITY RESPONSE

Objection – Application for Premises Licence No. 887243

Dear Southwark Licensing,

We as local residents and homeowners collectively object to the stated premises licence application. The application remains incompatible with the Licensing Objectives and with the Council's Licensing Policy, especially given the vulnerability of residents directly opposite and the long, documented history of problems connected to both the premises and the operator involved.

1. Safeguarding risks to vulnerable residents directly opposite the premises

Subject: Objection – Premises Licence Application No. 887243

Hi

Objection – Premises Licence Application No. 887243 (516 Old Kent Road – First Floor)

Name: [REDACTED]

Address: [REDACTED]

Email: [REDACTED]

Resident Impact Statement

- I live directly opposite the proposed license location and previous operation of this venue had caused me numerous issues with loud music during the evening and into the early hours of the morning
- in particular, late night events at this location have disrupted my sleep due to both loud music and noise levels as patrons congregate to enter and during closing hours when they disperse
- during these events I have witnessed people fighting and the evidence of people throwing up outside the location, often on the same side of the road as the block of flats or at the entrance to Marlborough grove so that they are not immediately visible to any security working at the location.
- there is frequently rubbish left around the front of the flats and the entrance to Marlborough grove including empty and partially full bottles of alcohol and nitrous oxide containers.

COMMUNITY RESPONSE

Objection – Application for Premises Licence No. 887243

Dear Southwark Licensing,

We as local residents collectively object to the stated premises licence application. The application remains incompatible with the Licensing Objectives and with the Council's Licensing Policy, especially given the vulnerability of residents directly opposite and the long, documented history of problems connected to both the premises and the operator involved.

1. Safeguarding risks to vulnerable residents directly opposite the premises The venue sits directly opposite multiple residential blocks, including John Penry House, which provides accommodation for older and vulnerable adults. Residents there require consistent and predictable night-time conditions. The application seeks a closing time that reaches into the early hours, including on working days. Alcohol-led activity, late dispersal, noise and increased footfall at those hours are directly at odds with the needs of a residential and vulnerable population. Southwark has safeguarding responsibilities toward residents in supported accommodation. Approving a late-night alcohol and entertainment licence at this location would introduce foreseeable risks to wellbeing, sleep, and personal safety.

Resident Impact Statement

- I live directly opposite, overlooking the premises and have frequently been affected by previous noise and disturbance.
- Late-night operation at this address has disrupted my sleep and affected my well-being and hence work. It feels unsafe to leave our building during operating times, including loud sound checks from early on during the day.
- Frequently, several times a year, for the past 9 years of residence here, I have had to call the police due to witnessing crime, disorder or antisocial behaviour linked to past venues here.
- During the summer months, the noise and music are unbearable, meaning we can't keep our windows open during the heat.
- I often travel for work, and leaving home early in the morning for a flight, or coming home late at night, does not feel safe because of patrons of the club blocking the entrance to the building - I've been pushed and threatened for trying to get into my building.
- Security seems to be concerned only about what happens on site, not for residents and families impacted.
- Rubbish and drug paraphernalia (such as laughing gas canisters) left around our building after events are left for residents to remove, and it impacts our management fees, as well as insurance costs due to the crime levels.

Dear Southwark Licensing,

We as local residents collectively object to the stated premises licence application. The application remains incompatible with the Licensing Objectives and with the Council's Licensing Policy, especially given the vulnerability of residents directly opposite and the long, documented history of problems connected to both the premises and the operator involved.

Resident Impact Statement

I live directly opposite the premises. They have been used as a night club several times before and have had their license suspended several times. The noise from the venue is clearly audible when it's being used as a club and disturbs mine and my partner me sleep. I have regularly witnessed anti social behaviour taking place in the area on nights when the club is open. This has included large crowds of people congregating in the area outside the club at closing time, shouting, fighting or making lots of noise. There have also been several serious crimes linked to the venue over the years, including GBH on a police officer, a rape of a female patron and, most recently, a gang fight taking place in the street outside the venue after an under 18s club night, which led to a 17 year old man being fatally stabbed in the street right outside our home. This venue is a magnet for violent crime. Please do not grant this most recent license application.

COMMUNITY RESPONSE

Objection – Application for Premises Licence No. 887243

Dear Southwark Licensing,

We as local residents collectively object to the stated premises licence application. The application remains incompatible with the Licensing Objectives and with the Council's Licensing Policy, especially given the vulnerability of residents directly opposite and the long, documented history of problems connected to both the premises and the operator involved.

1. Safeguarding risks to vulnerable residents directly opposite the premises
The venue sits directly opposite multiple residential blocks, including John Penry House, which provides accommodation for older and vulnerable adults. Residents there require consistent and predictable night-time conditions. The application seeks a closing time that reaches into the early hours, including on working days. Alcohol-led activity, late dispersal, noise and increased footfall at those hours are directly at odds with the needs of a residential and vulnerable population.
Southwark has safeguarding responsibilities toward residents in supported accommodation. Approving a late-night alcohol and entertainment licence at this location would introduce foreseeable risks to wellbeing, sleep, and personal safety.

2. The surrounding community includes families, children, carers and shift workers
Directly opposite and around the premises are high-density residential blocks with:

- families with young children
- early-start workers
- elderly residents
- individuals previously affected by noise and nuisance from this address

Children use nearby bus stops early in the morning. Very late-night alcohol-led dispersal increases the likelihood of noise, litter and disturbance only hours before school and work traffic begins. The character of the area is residential and sensitive. The presence of shops or restaurants on the main road is not comparable. Ordinary businesses do not generate hundreds of people leaving a late-night venue, with associated alcohol use, drug use and disorder.

3. The premises and the operator have a documented history of serious issues at this address

Southwark's Licensing Policy states that the past compliance history of both the premises and the management is relevant to decision-making. Both matter here.

This premises has previously been associated with:

- repeated licensing interventions
- suspensions
- noise problems
- serious disorder
- and licence revocation

These were not isolated events but long-running issues that required formal action.

The current applicant company's director, Mr. Eric Doe, previously operated premises at this same address during periods when these problems occurred. This raises concerns about continuity of management. The application does not demonstrate any change in approach, structure or oversight that would reduce risk. A return to late-night operation under the same individual increases the likelihood of repeated harm.

The applicant's own submitted conditions include a provision stating that "Mr. Eric Doe... shall have no involvement in the operation of the premises whatsoever and shall be permanently excluded from the premises." The contradiction is clear: the director of the applicant company is the same individual the submitted conditions state must be excluded. This raises concerns about accuracy, credibility and workability, and shows that the operating schedule has not been properly reviewed or tailored to this application.

4. The operating model indicates nightclub-style activity, not a restaurant

Although described as a "restaurant and lounge," the operating schedule requests:

- alcohol service until 03:00
- closing at 03:30
- amplified and recorded music
- SIA door supervisors
- body-worn cameras
- off-sales
- large private events

These are features of an alcohol-led late-night venue, not a food-led premises.

Previous operators at this address used similar descriptions but operated as nightclubs. The Committee should consider the realistic use of the premises based on the hours and conditions requested.

5. The location is structurally unsuitable for late-night dispersal

The entrance directly faces homes. There is no buffer zone, no set-back and no safe dispersal route. Patrons inevitably spill into residential walkways, bus stops and the entrances of neighbouring blocks.

Late-night taxis, smoking areas, queues, noise breakout and groups congregating outside are unavoidable outcomes of the hours sought. Food vendors regularly appear to serve intoxicated patrons and end up operating outside residential buildings. The physical layout and proximity to homes make this site unsuitable for late-night operation, regardless of conditions offered.

6. Enforcement difficulties have occurred at this address previously

Council teams have had to intervene repeatedly at this premises. There were occasions where engagement with management was challenging during late-night operation, and Southwark's noise team reported feeling unsafe entering the venue to investigate complaints. This raises concerns about enforceability and cooperation if a similar operating model returns.

Licences can only be granted where conditions are realistically enforceable. Given the history at this address, that threshold has not been met.

7. Residents want well-run local businesses — but not these hours at this site

Residents are not opposed to restaurants, hospitality or cultural activity. A food-led venue closing around 22:30–23:00 would be consistent with the area and would not attract strong objection. The issues relate specifically to:

- the very late hours
- the alcohol-led model
- the history of crime and disorder
- the continuity of the operator
- and the vulnerability of nearby residents

8. Noise levels cannot be mitigated due to proximity to homes

Previous operators attempted different measures to reduce noise breakout, including makeshift window coverings and temporary insulation. None were effective. The building's structure and its proximity to residential windows make noise control impossible.

Bass vibration, crowd noise, door activity, taxi engines and groups gathering outside carry directly into homes opposite. The physical design and location of the premises make disturbance unavoidable at the hours requested.

9. The venue has previously attracted serious crime, not minor incidents

This address has repeatedly drawn police involvement for violence, disorder and safeguarding concerns. Residents have raised these issues for years. Incidents have included:

- serious assaults
- incidents involving weapons
- drug activity
- and sexual assaults

Residents have repeatedly warned that late-night operation at this premises puts people at risk. The recurring pattern raises a clear question: how many more interventions, violent incidents and endangered residents are required before it is accepted that late-night licensing at this address does not work?

Request to the Committee

For the reasons above – safeguarding risks, residential vulnerability, the track record of both the premises and operator, the alcohol-led operating model, dispersal and enforcement concerns, structural noise issues, the history of serious crime and Southwark’s licensing policy – the application should be refused.

If any licence is granted, the hours should be significantly reduced and aligned with the needs of the local community.

Objection – Premises Licence Application No. 887243 (516 Old Kent Road – First Floor)

Name: [REDACTED]

Address: [REDACTED]

Resident Impact Statement

- No club here is able to control the noise levels enough. Every night they operate here we are kept awake until really night including on work nights.
- We have had patrons of night clubs vomiting against our building windows
- The police sirens and calls to the area late at night because of the night club also wake us up. The blue lights shining into the windows.
- All previous operators of night clubs here pretend that it's not a nightclub and instead claim it as a restaurant, bar or cultural centre. Please protect local residents.

COMMUNITY RESPONSE

Objection – Application for Premises Licence No. 887243

Dear Southwark Licensing,

We as local residents collectively object to the stated premises licence application. The application remains incompatible with the Licensing Objectives and with the Council's Licensing Policy, especially given the vulnerability of residents directly opposite and the long, documented history of problems connected to both the premises and the operator involved.

1. Safeguarding risks to vulnerable residents directly opposite the premises

The venue sits directly opposite multiple residential blocks, including John Penry House, which provides accommodation for older and vulnerable adults. Residents there require consistent and predictable night-time conditions. The application seeks a closing time that reaches into the early hours, including on working days. Alcohol-led activity, late dispersal, noise and increased footfall at those hours are directly at odds with the needs of a residential and vulnerable population.

Southwark has safeguarding responsibilities toward residents in supported accommodation. Approving a late-night alcohol and entertainment licence at this location would introduce foreseeable risks to wellbeing, sleep, and personal safety.

2. The surrounding community includes families, children, carers and shift workers

Directly opposite and around the premises are high-density residential blocks with:

- families with young children
- early-start workers
- elderly residents

- individuals previously affected by noise and nuisance from this address

Children use nearby bus stops early in the morning. Very late-night alcohol-led dispersal increases the likelihood of noise, litter and disturbance only hours before school and work traffic begins. The character of the area is residential and sensitive.

The presence of shops or restaurants on the main road is not comparable. Ordinary businesses do not generate hundreds of people leaving a late-night venue, with associated alcohol use, drug use and disorder.

3. The premises and the operator have a documented history of serious issues at this address

Southwark's Licensing Policy states that the past compliance history of both the premises and the management is relevant to decision-making. Both matter here.

This premises has previously been associated with:

- repeated licensing interventions
- suspensions
- noise problems
- serious disorder
- and licence revocation

These were not isolated events but long-running issues that required formal action. The current applicant company's director, Mr. Eric Doe, previously operated premises at this same address during periods when these problems occurred. This raises concerns about continuity of management. The application does not demonstrate any change in approach, structure or oversight that would reduce risk. A return to late-night operation under the same individual increases the likelihood of repeated harm.

The applicant's own submitted conditions include a provision stating that "Mr. Eric Doe... shall have no involvement in the operation of the premises whatsoever and shall be permanently excluded from the premises." The contradiction is clear: the director of the applicant company is the same individual the submitted conditions state must be excluded. This raises concerns about accuracy, credibility and workability, and shows that the operating schedule has not been properly reviewed or tailored to this application.

4. The operating model indicates nightclub-style activity, not a restaurant

Although described as a "restaurant and lounge," the operating schedule requests:

- alcohol service until 03:00
- closing at 03:30
- amplified and recorded music
- SIA door supervisors
- body-worn cameras
- off-sales
- large private events

These are features of an alcohol-led late-night venue, not a food-led premises. Previous operators at this address used similar descriptions but operated as nightclubs. The Committee should consider the realistic use of the premises based on the hours and conditions requested.

5. The location is structurally unsuitable for late-night dispersal

The entrance directly faces homes. There is no buffer zone, no set-back and no safe dispersal route. Patrons inevitably spill into residential walkways, bus stops and the entrances of neighbouring blocks.

Late-night taxis, smoking areas, queues, noise breakout and groups congregating outside are unavoidable outcomes of the hours sought. Food vendors regularly appear to serve intoxicated patrons and end up operating outside residential buildings. The physical layout and proximity to homes make this site unsuitable for late-night operation, regardless of conditions offered.

6. Enforcement difficulties have occurred at this address previously

Council teams have had to intervene repeatedly at this premises. There were occasions where engagement with management was challenging during late-night operation, and Southwark's noise team reported feeling unsafe entering the venue to investigate complaints. This raises concerns about enforceability and cooperation if a similar operating model returns.

Resident Impact Statement

- I live on the ground floor, my bedroom is directly opposite the premises and I have been affected by previous noise and disturbance throughout the night
- Late-night operation at this address has disrupted sleep and affected my wellbeing/work - particularly given the licensing seems to permit late night activity on Sunday evenings/Monday mornings - I have recurrently had disturbed sleep due to the poor soundproofing of the venue, with the constant thud of bass resonating across Old Kent Road to my bedroom
- I have witnessed vast, intimidating crowds loitering outside in the early hours, illegal food vendors trading, illegal parking by patrons blocking access to Six Bridges Trading Estate, littering of drug paraphernalia directly outside my property, antisocial behaviour outside my bedroom window - all linked to previous venues at this address. I honestly feel unsafe in my own home.

I would also like to add, if you talk to local businesses their staff report feeling unsafe with that venue operating and its patrons loitering in the early hours, when the staff are arriving at work, often alone trying to open up their units. I'm specifically referencing Pets at Home employees - as they've told me directly of this issue.

COMMUNITY RESPONSE

Objection – Application for Premises Licence No. 887243

Dear Southwark Licensing,

We as local residents collectively object to the stated premises licence application. The application remains incompatible with the Licensing Objectives and with the Council's Licensing Policy, especially given the vulnerability of residents directly opposite and the long, documented history of problems connected to both the premises and the operator involved.

1. Safeguarding risks to vulnerable residents directly opposite the premises
The venue sits directly opposite multiple residential blocks, including John Penry House, which provides accommodation for older and vulnerable adults. Resident Impact Statement

On 27th August 2025 at approximately 22:00 an individual was fatally stabbed in the middle of the road, between the premises in question and the main entrance to my building. Another individual was also stabbed.

There was blood stains on the steps leading into my building. There are still blood stains on the pavement. My building was inside a large police cordon from 48 hours during which point we weren't able to receive visitors, post, deliveries etc, and had to be escorted off the scene to go to the supermarket.

Police enquiries following the incident confirmed to me that the victims and perpetrators were known to police, and to each other. The premises in question is therefore a meeting place where tensions like this spill onto the street.

I don't wish to risk being caught up in the next incident.

COMMUNITY RESPONSE

Objection – Application for Premises Licence No. 887243

Dear Southwark Licensing,

We as local residents collectively object to the stated premises licence application. The application remains incompatible with the Licensing Objectives and with the Council's Licensing Policy, especially given the vulnerability of residents directly opposite and the long, documented history of problems connected to both the premises and the operator involved.

1. Safeguarding risks to vulnerable residents directly opposite the premises
The venue sits directly opposite multiple residential blocks, including John Penry House, which provides accommodation for older and vulnerable adults. Residents there require consistent and predictable night-time conditions. The application seeks a closing time that reaches into the early hours, including on working days. Alcohol-led activity, late dispersal, noise and increased footfall at those hours are directly at odds with the needs of a residential and vulnerable population. Southwark has safeguarding responsibilities toward residents in supported accommodation. Approving a late-night alcohol and entertainment licence at this location would introduce foreseeable risks to wellbeing, sleep, and personal safety.

2. The surrounding community includes families, children, carers and shift workers. Directly opposite and around the premises are high-density residential blocks with:

COMMUNITY RESPONSE

Objection – Application for Premises Licence No. 887243

Dear Southwark Licensing,

We as local residents collectively object to the stated premises licence application. The application remains incompatible with the Licensing Objectives and with the Council's Licensing Policy, especially given the vulnerability of residents directly opposite and the long, documented history of problems connected to both the premises and the operator involved.

1. Safeguarding risks to vulnerable residents directly opposite the premises The venue sits directly opposite multiple residential blocks, including John Penry House, which provides accommodation for older and vulnerable adults. Residents there require consistent and predictable night-time conditions. The application seeks a closing time that reaches into the early hours, including on working days. Alcohol-led activity, late dispersal, noise and increased footfall at those hours are directly at odds with the needs of a residential and vulnerable population.

Southwark has safeguarding responsibilities toward residents in supported accommodation. Approving a late-night alcohol and entertainment licence at this location would introduce foreseeable risks to wellbeing, sleep, and personal safety.

2. The surrounding community includes families, children, carers and shift workers Directly opposite and around the premises are high-density residential blocks with:

- families with young children
- early-start workers
- elderly residents
- individuals previously affected by noise and nuisance from this address Children use nearby bus stops early in the morning. Very late-night alcohol-led dispersal

increases the likelihood of noise, litter and disturbance only hours before school and work traffic begins. The character of the area is residential and sensitive.

The presence of shops or restaurants on the main road is not comparable. Ordinary businesses do not generate hundreds of people leaving a late-night venue, with associated alcohol use, drug use and disorder.

3. The premises and the operator have a documented history of serious issues at this address Southwark's Licensing Policy states that the past compliance history of both the premises and the management is relevant to decision-making. Both matter here.

This premises has previously been associated with:

- repeated licensing interventions
- suspensions
- noise problems
- serious disorder
- and licence revocation

These were not isolated events but long-running issues that required formal action.

The current applicant company's director, Mr. Eric Doe, previously operated premises at this same address during periods when these problems occurred. This raises concerns about continuity of management. The application does not demonstrate any change in approach, structure or oversight that would reduce risk. A return to late-night operation under the same individual increases the likelihood of repeated harm.

The applicant's own submitted conditions include a provision stating that "Mr. Eric Doe... shall have no involvement in the operation of the premises whatsoever and shall be permanently excluded from the premises." The contradiction is clear: the director of the applicant company is the same individual the submitted conditions state must be excluded. This raises concerns about accuracy, credibility and workability, and shows that the operating schedule has not been properly reviewed or tailored to this application.

4. The operating model indicates nightclub-style activity, not a restaurant Although described as a "restaurant and lounge," the operating schedule requests:

- alcohol service until 03:00
- closing at 03:30
- amplified and recorded music
- SIA door supervisors
- body-worn cameras
- off-sales
- large private events

These are features of an alcohol-led late-night venue, not a food-led premises.

Previous operators at this address used similar descriptions but operated as nightclubs. The Committee should consider the realistic use of the premises based on the hours and conditions requested.

5. The location is structurally unsuitable for late-night dispersal The entrance directly faces homes. There is no buffer zone, no set-back and no safe dispersal route.

Patrons inevitably spill into residential walkways, bus stops and the entrances of neighbouring blocks.

Late-night taxis, smoking areas, queues, noise breakout and groups congregating outside are unavoidable outcomes of the hours sought. Food vendors regularly appear to serve intoxicated patrons and end up operating outside residential buildings. The physical layout and proximity to homes make this site unsuitable for late-night operation, regardless of conditions offered.

6. Enforcement difficulties have occurred at this address previously Council teams have had to intervene repeatedly at this premises. There were occasions where engagement with management was challenging during late-night operation, and Southwark's noise team reported feeling unsafe entering the venue to investigate complaints. This raises concerns about enforceability and cooperation if a similar operating model returns.

Licences can only be granted where conditions are realistically enforceable. Given the history at this address, that threshold has not been met.

7. Residents want well-run local businesses — but not these hours at this site Residents are not opposed to restaurants, hospitality or cultural activity. A food-led venue closing around 22:30–23:00 would be consistent with the area and would not attract strong objection. The issues relate specifically to:

- the very late hours
- the alcohol-led model
- the history of crime and disorder
- the continuity of the operator
- and the vulnerability of nearby residents

8. Noise levels cannot be mitigated due to proximity to homes Previous operators attempted different measures to reduce noise breakout, including makeshift window coverings and temporary insulation. None were effective. The building's structure and its proximity to residential windows make noise control impossible.

Bass vibration, crowd noise, door activity, taxi engines and groups gathering outside carry directly into homes opposite. The physical design and location of the premises make disturbance unavoidable at the hours requested.

9. The venue has previously attracted serious crime, not minor incidents This address has repeatedly drawn police involvement for violence, disorder and safeguarding concerns. Residents have raised these issues for years. Incidents have included:

- serious assaults
- incidents involving weapons
- drug activity
- and sexual assaults

Residents have repeatedly warned that late-night operation at this premises puts people at risk. The recurring pattern raises a clear question: how many more interventions, violent incidents and endangered residents are required before it is accepted that late-night licensing at this address does not work?

Request to the Committee

For the reasons above – safeguarding risks, residential vulnerability, the track record of both the premises and operator, the alcohol-led operating model, dispersal and

enforcement concerns, structural noise issues, the history of serious crime and Southwark's licensing policy – the application should be refused.

If any licence is granted, the hours should be significantly reduced and aligned with the needs of the local community.

- I feel unsafe when going home late hours.

COMMUNITY RESPONSE

Objection – Application for Premises Licence No. 887243

Dear Southwark Licensing,

We as local residents collectively object to the stated premises licence application. The application remains incompatible with the Licensing Objectives and with the Council's Licensing Policy, especially given the vulnerability of residents directly opposite and the long, documented history of problems connected to both the premises and the operator involved.

1. Safeguarding risks to vulnerable residents directly opposite the premises

The venue sits directly opposite multiple residential blocks, including John Penry House, which provides accommodation for older and vulnerable adults. Residents there require consistent and predictable night-time conditions. The application seeks a closing time that reaches into the early hours, including on working days. Alcohol-led activity, late dispersal, noise and increased footfall at those hours are directly at odds with the needs of a residential and vulnerable population.

Southwark has safeguarding responsibilities toward residents in supported accommodation. Approving a late-night alcohol and entertainment licence at this location would introduce foreseeable risks to wellbeing, sleep, and personal safety.

2. The surrounding community includes families, children, carers and shift workers

Directly opposite and around the premises are high-density residential blocks with:

- families with young children
- early-start workers
- elderly residents
- individuals previously affected by noise and nuisance from this address

Children use nearby bus stops early in the morning. Very late-night alcohol-led

dispersal increases the likelihood of noise, litter and disturbance only hours before school and work traffic begins. The character of the area is residential and sensitive. The presence of shops or restaurants on the main road is not comparable. Ordinary businesses do not generate hundreds of people leaving a late-night venue, with associated alcohol use, drug use and disorder.

3. The premises and the operator have a documented history of serious issues at this address

Southwark's Licensing Policy states that the past compliance history of both the premises and the management is relevant to decision-making. Both matter here. This premises has previously been associated with:

- repeated licensing interventions
- suspensions
- noise problems
- serious disorder
- and licence revocation

These were not isolated events but long-running issues that required formal action. The current applicant company's director, Mr. Eric Doe, previously operated premises at this same address during periods when these problems occurred. This raises concerns about continuity of management. The application does not demonstrate any change in approach, structure or oversight that would reduce risk. A return to late-night operation under the same individual increases the likelihood of repeated harm.

The applicant's own submitted conditions include a provision stating that "Mr. Eric Doe... shall have no involvement in the operation of the premises whatsoever and shall be permanently excluded from the premises." The contradiction is clear: the director of the applicant company is the same individual the submitted conditions state must be excluded. This raises concerns about accuracy, credibility and workability, and shows that the operating schedule has not been properly reviewed or tailored to this application.

4. The operating model indicates nightclub-style activity, not a restaurant

Although described as a "restaurant and lounge," the operating schedule requests:

- alcohol service until 03:00
- closing at 03:30
- amplified and recorded music
- SIA door supervisors
- body-worn cameras
- off-sales
- large private events

These are features of an alcohol-led late-night venue, not a food-led premises.

Previous operators at this address used similar descriptions but operated as nightclubs. The Committee should consider the realistic use of the premises based on the hours and conditions requested.

5. The location is structurally unsuitable for late-night dispersal

The entrance directly faces homes. There is no buffer zone, no set-back and no safe dispersal route. Patrons inevitably spill into residential walkways, bus stops and the entrances of neighbouring blocks.

Late-night taxis, smoking areas, queues, noise breakout and groups congregating

outside are unavoidable outcomes of the hours sought. Food vendors regularly appear to serve intoxicated patrons and end up operating outside residential buildings. The physical layout and proximity to homes make this site unsuitable for late-night operation, regardless of conditions offered.

6. Enforcement difficulties have occurred at this address previously
Council teams have had to intervene repeatedly at this premises. There were occasions where engagement with management was challenging during late-night operation, and Southwark's noise team reported feeling unsafe entering the venue to investigate complaints. This raises concerns about enforceability and cooperation if a similar operating model returns.

Licences can only be granted where conditions are realistically enforceable. Given the history at this address, that threshold has not been met.

7. Residents want well-run local businesses — but not these hours at this site
Residents are not opposed to restaurants, hospitality or cultural activity. A food-led venue closing around 22:30–23:00 would be consistent with the area and would not attract strong objection. The issues relate specifically to:

- the very late hours
- the alcohol-led model
- the history of crime and disorder
- the continuity of the operator
- and the vulnerability of nearby residents

8. Noise levels cannot be mitigated due to proximity to homes

Previous operators attempted different measures to reduce noise breakout, including makeshift window coverings and temporary insulation. None were effective. The building's structure and its proximity to residential windows make noise control impossible.

Bass vibration, crowd noise, door activity, taxi engines and groups gathering outside carry directly into homes opposite. The physical design and location of the premises make disturbance unavoidable at the hours requested.

9. The venue has previously attracted serious crime, not minor incidents

This address has repeatedly drawn police involvement for violence, disorder and safeguarding concerns. Residents have raised these issues for years. Incidents have included:

- serious assaults
- incidents involving weapons
- drug activity
- and sexual assaults

Residents have repeatedly warned that late-night operation at these premises puts people at risk. The recurring pattern raises a clear question: how many more interventions, violent incidents and endangered residents are required before it is accepted that late-night licensing at this address does not work?

Request to the Committee

For the reasons above – safeguarding risks, residential vulnerability, the track record of both the premises and operator, the alcohol-led operating model, dispersal and

enforcement concerns, structural noise issues, the history of serious crime and Southwark's licensing policy – the application should be refused.

If any licence is granted, the hours should be significantly reduced and aligned with the needs of the local community.

Objection – Premises Licence Application No. 887243 (516 Old Kent Road – First Floor)

Name: [REDACTED]

Address: [REDACTED]

Email: [REDACTED]

Impact Statement

- As residents opposite the premises we have been affected by noise and disturbance in the past.
- This is a residential area of families and an elderly home and the late night noise pollution is very disruptive.
- We have witnessed crime, disorder, antisocial behaviour and mass littering from events at this venue before, with several incidents involving police. Owners have repeatedly shown they cannot address these issues.

COMMUNITY RESPONSE

Objection – Application for Premises Licence No. 887243

Dear Southwark Licensing,

We as local residents collectively object to the stated premises licence application. The application remains incompatible with the Licensing Objectives and with the Council's Licensing Policy, especially given the vulnerability of residents directly opposite and the long, documented history of problems connected to both the premises and the operator involved.

1. Safeguarding risks to vulnerable residents directly opposite the premises
The venue sits directly opposite multiple residential blocks, including John Penry House, which provides accommodation for older and vulnerable adults. Residents there require consistent and predictable night-time conditions. The application seeks a closing time that reaches into the early hours, including on working days. Alcohol-led activity, late dispersal, noise and increased footfall at those hours are directly at odds with the needs of a residential and vulnerable population.
Southwark has safeguarding responsibilities toward residents in supported accommodation. Approving a late-night alcohol and entertainment licence at this location would introduce foreseeable risks to wellbeing, sleep, and personal safety.
2. The surrounding community includes families, children, carers and shift workers
Directly opposite and around the premises are high-density residential blocks with:

Resident Impact Statement

I live almost directly opposite the premises and have done so for approximately ten years. Over that time I've had to report noise complaints where there have been disturbances late into the night, sometimes on weeknights. This has affected my work and wellbeing. I've also witnessed crime and anti-social behaviour on numerous occasions linked to past venues here, and there's regularly a police presence that seems necessary.

COMMUNITY RESPONSE

Objection – Application for Premises Licence No. 887243

Dear Southwark Licensing,

We as local residents collectively object to the stated premises licence application. The application remains incompatible with the Licensing Objectives and with the Council's Licensing Policy, especially given the vulnerability of residents directly opposite and the long, documented history of problems connected to both the premises and the operator involved.

1. Safeguarding risks to vulnerable residents directly opposite the premises
The venue sits directly opposite multiple residential blocks, including John Penry House, which provides accommodation for older and vulnerable adults. Residents there require consistent and predictable night-time conditions. The application seeks a closing time that reaches into the early hours, including on working days. Alcohol-led activity, late dispersal, noise and increased footfall at those hours are directly at odds with the needs of a residential and vulnerable population.

Southwark has safeguarding responsibilities toward residents in supported accommodation. Approving a late-night alcohol and entertainment licence at this location would introduce foreseeable risks to wellbeing, sleep, and personal safety.

2. The surrounding community includes families, children, carers and shift workers
Directly opposite and around the premises are high-density residential blocks with:

Objection - Premises Licence Application No. 887243 (516 Old Kent Road - First Floor)

[REDACTED]
[REDACTED]
[REDACTED]
[REDACTED]

[REDACTED]

Dear Southwark Licensing Team,

I am writing as a resident living directly opposite 516 Old Kent Road, to express my strong objection to the proposed premises licence.

I have been personally affected by late-night noise, crowds and disturbance from previous venues operating at this address. Even with the window shut, I could hear shouting, music, taxis arriving and groups gathering outside late into the night.

I work as a nurse and often have early starts or long shifts. When the venue operate late at night, my sleep gets disrupted, leaving me exhausted for work the next day. This has had a real impact on my wellbeing.

There have been time when I returned home late at night and felt unsafe because of groups outside the venue, arguments and antisocial behaviour. I have also witnessed police involvement in the past at this location. This has made me anxious about walking home at night and has affected my sense of security in my own neighbourhood.

I moved to this area expecting a residential environment, but the previous late night activity from this address has made my home life noticeably more stressful.

I worry that granting another late night licence will bring back the same problems I have experienced before.

For this reason, I respectfully ask that this application is not approved. Allowing late night alcohol-led activity at this location would directly affect my sleep, my health, my work as a nurse, and my overall safety.

Thank you for considering my objection.

Kind regards,

[REDACTED]

COMMUNITY RESPONSE

Objection – Application for Premises Licence No. 887243

Dear Southwark Licensing,

We as local residents collectively object to the stated premises licence application. The application remains incompatible with the Licensing Objectives and with the Council's Licensing Policy, especially given the vulnerability of residents directly opposite and the long, documented history of problems connected to both the premises and the operator involved.

1. Safeguarding risks to vulnerable residents directly opposite the premises

The venue sits directly opposite multiple residential blocks, including John Penry House, which provides accommodation for older and vulnerable adults. Residents there require consistent and predictable night-time conditions. The application seeks a closing time that reaches into the early hours, including on working days. Alcohol-led activity, late dispersal, noise and increased footfall at those hours are directly at odds with the needs of a residential and vulnerable population.

Southwark has safeguarding responsibilities toward residents in supported accommodation. Approving a late-night alcohol and entertainment licence at this location would introduce foreseeable risks to wellbeing, sleep, and personal safety.

2. The surrounding community includes families, children, carers and shift workers
Directly opposite and around the premises are high-density residential blocks with:

Resident Impact Statement

I have a flat located at [REDACTED] I rent this out to 3 young professional women. From having lived myself in the property prior to moving out, I did not feel safe walking around in the area after dark on my own especially when events were on at the proposed licence location. There was general disorderly, sometimes violent behavior, the aftermath of which could be observed the next morning in the form of broken glass and evidence of drug use. I would be concerned for the welfare of my tenants and it makes the flat a less desirable place to live.

COMMUNITY RESPONSE

Objection – Application for Premises Licence No. 887243

Dear Southwark Licensing,

We as local residents collectively object to the stated premises licence application. The application remains incompatible with the Licensing Objectives and with the Council's Licensing Policy, especially given the vulnerability of residents directly opposite and the long, documented history of problems connected to both the premises and the operator involved.

1. Safeguarding risks to vulnerable residents directly opposite the premises
The venue sits directly opposite multiple residential blocks, including John Penry House, which provides accommodation for older and vulnerable adults. Residents there require consistent and predictable night-time conditions. The application seeks a closing time that reaches into the early hours, including on working days. Alcohol-led activity, late dispersal, noise and increased footfall at those hours are directly at odds with the needs of a residential and vulnerable population.

Southwark has safeguarding responsibilities toward residents in supported accommodation. Approving a late-night alcohol and entertainment licence at this location would introduce foreseeable risks to wellbeing, sleep, and personal safety.

2. The surrounding community includes families, children, carers and shift workers
Directly opposite and around the premises are high-density residential blocks with:

- families with young children
- early-start workers

- elderly residents
- individuals previously affected by noise and nuisance from this address

Children use nearby bus stops early in the morning. Very late-night alcohol-led dispersal increases the likelihood of noise, litter and disturbance only hours before school and work traffic begins. The character of the area is residential and sensitive. The presence of shops or restaurants on the main road is not comparable. Ordinary businesses do not generate hundreds of people leaving a late-night venue, with associated alcohol use, drug use and disorder.

3. The premises and the operator have a documented history of serious issues at this address

Southwark's Licensing Policy states that the past compliance history of both the premises and the management is relevant to decision-making. Both matter here. This premises has previously been associated with:

- repeated licensing interventions
- suspensions
- noise problems
- serious disorder
- and licence revocation

These were not isolated events but long-running issues that required formal action. The current applicant company's director, Mr. Eric Doe, previously operated premises at this same address during periods when these problems occurred. This raises concerns about continuity of management. The application does not demonstrate any change in approach, structure or oversight that would reduce risk. A return to late-night operation under the same individual increases the likelihood of repeated harm.

The applicant's own submitted conditions include a provision stating that "Mr. Eric Doe... shall have no involvement in the operation of the premises whatsoever and shall be permanently excluded from the premises." The contradiction is clear: the director of the applicant company is the same individual the submitted conditions state must be excluded. This raises concerns about accuracy, credibility and workability, and shows that the operating schedule has not been properly reviewed or tailored to this application.

4. The operating model indicates nightclub-style activity, not a restaurant

Although described as a "restaurant and lounge," the operating schedule requests:

- alcohol service until 03:00
- closing at 03:30
- amplified and recorded music
- SIA door supervisors
- body-worn cameras
- off-sales
- large private events

These are features of an alcohol-led late-night venue, not a food-led premises.

Previous operators at this address used similar descriptions but operated as nightclubs. The Committee should consider the realistic use of the premises based on the hours and conditions requested.

5. The location is structurally unsuitable for late-night dispersal

The entrance directly faces homes. There is no buffer zone, no set-back and no safe

dispersal route. Patrons inevitably spill into residential walkways, bus stops and the entrances of neighbouring blocks.

Late-night taxis, smoking areas, queues, noise breakout and groups congregating outside are unavoidable outcomes of the hours sought. Food vendors regularly appear to serve intoxicated patrons and end up operating outside residential buildings. The physical layout and proximity to homes make this site unsuitable for late-night operation, regardless of conditions offered.

6. Enforcement difficulties have occurred at this address previously
Council teams have had to intervene repeatedly at this premises. There were occasions where engagement with management was challenging during late-night operation, and Southwark's noise team reported feeling unsafe entering the venue to investigate complaints. This raises concerns about enforceability and cooperation if a similar operating model returns.

Licences can only be granted where conditions are realistically enforceable. Given the history at this address, that threshold has not been met.

7. Residents want well-run local businesses — but not these hours at this site
Residents are not opposed to restaurants, hospitality or cultural activity. A food-led venue closing around 22:30–23:00 would be consistent with the area and would not attract strong objection. The issues relate specifically to:

- the very late hours
- the alcohol-led model
- the history of crime and disorder
- the continuity of the operator
- and the vulnerability of nearby residents

8. Noise levels cannot be mitigated due to proximity to homes

Previous operators attempted different measures to reduce noise breakout, including makeshift window coverings and temporary insulation. None were effective. The building's structure and its proximity to residential windows make noise control impossible.

Bass vibration, crowd noise, door activity, taxi engines and groups gathering outside carry directly into homes opposite. The physical design and location of the premises make disturbance unavoidable at the hours requested.

9. The venue has previously attracted serious crime, not minor incidents

This address has repeatedly drawn police involvement for violence, disorder and safeguarding concerns. Residents have raised these issues for years. Incidents have included:

- serious assaults
- incidents involving weapons
- drug activity
- and sexual assaults

Residents have repeatedly warned that late-night operation at this premises puts people at risk. The recurring pattern raises a clear question: how many more interventions, violent incidents and endangered residents are required before it is accepted that late-night licensing at this address does not work?

Request to the Committee

For the reasons above – safeguarding risks, residential vulnerability, the track record of both the premises and operator, the alcohol-led operating model, dispersal and enforcement concerns, structural noise issues, the history of serious crime and Southwark’s licensing policy – the application should be refused.

If any licence is granted, the hours should be significantly reduced and aligned with the needs of the local community.

Local Residents of Old Kent Road SE1

Resident Impact Statement

I live directly opposite the premises and have been affected by previous noise. I have witnessed crime, disorder or antisocial behaviour linked to past venues here. Antisocial activities taking place at the premises have significantly negatively impacted quality of my life and wellbeing.

COMMUNITY RESPONSE

Objection – Application for Premises Licence No. 887243

Dear Southwark Licensing,

We as local residents collectively object to the stated premises licence application. The application remains incompatible with the Licensing Objectives and with the Council's Licensing Policy, especially given the vulnerability of residents directly opposite and the long, documented history of problems connected to both the premises and the operator involved.

1. Safeguarding risks to vulnerable residents directly opposite the premises The venue sits directly opposite multiple residential blocks, including John Penry House, which provides accommodation for older and vulnerable adults. Residents there require consistent and predictable night-time conditions. The application seeks a closing time that reaches into the early hours, including on working days. Alcohol-led activity, late dispersal, noise and increased footfall at those hours are directly at odds with the needs of a residential and vulnerable population.

Southwark has safeguarding responsibilities toward residents in supported accommodation. Approving a late-night alcohol and entertainment licence at this location would introduce foreseeable risks to wellbeing, sleep, and personal safety.

2. The surrounding community includes families, children, carers and shift workers Directly opposite and around the premises are high-density residential blocks with:

- families with young children
- early-start workers
- elderly residents
- individuals previously affected by noise and nuisance from this address Children use nearby bus stops early in the morning. Very late-night alcohol-led dispersal increases

the likelihood of noise, litter and disturbance only hours before school and work traffic begins. The character of the area is residential and sensitive.

The presence of shops or restaurants on the main road is not comparable. Ordinary businesses do not generate hundreds of people leaving a late-night venue, with associated alcohol use, drug use and disorder.

3. The premises and the operator have a documented history of serious issues at this address Southwark's Licensing Policy states that the past compliance history of both the premises and the management is relevant to decision-making. Both matter here. This premises has previously been associated with:

- repeated licensing interventions
- suspensions
- noise problems
- serious disorder
- and licence revocation

These were not isolated events but long-running issues that required formal action.

The current applicant company's director, Mr. Eric Doe, previously operated premises at this same address during periods when these problems occurred. This raises concerns about continuity of management. The application does not demonstrate any change in approach, structure or oversight that would reduce risk. A return to late-night operation under the same individual increases the likelihood of repeated harm.

The applicant's own submitted conditions include a provision stating that "Mr. Eric Doe... shall have no involvement in the operation of the premises whatsoever and shall be permanently excluded from the premises." The contradiction is clear: the director of the applicant company is the same individual the submitted conditions state must be excluded. This raises concerns about accuracy, credibility and workability, and shows that the operating schedule has not been properly reviewed or tailored to this application.

4. The operating model indicates nightclub-style activity, not a restaurant Although described as a "restaurant and lounge," the operating schedule requests:

- alcohol service until 03:00
- closing at 03:30
- amplified and recorded music
- SIA door supervisors
- body-worn cameras
- off-sales
- large private events

These are features of an alcohol-led late-night venue, not a food-led premises. Previous operators at this address used similar descriptions but operated as nightclubs. The Committee should consider the realistic use of the premises based on the hours and conditions requested.

5. The location is structurally unsuitable for late-night dispersal The entrance directly faces homes. There is no buffer zone, no set-back and no safe dispersal route. Patrons

inevitably spill into residential walkways, bus stops and the entrances of neighbouring blocks.

Late-night taxis, smoking areas, queues, noise breakout and groups congregating outside are unavoidable outcomes of the hours sought. Food vendors regularly appear to serve intoxicated patrons and end up operating outside residential buildings. The physical layout and proximity to homes make this site unsuitable for late-night operation, regardless of conditions offered.

6. Enforcement difficulties have occurred at this address previously Council teams have had to intervene repeatedly at this premises. There were occasions where engagement with management was challenging during late-night operation, and Southwark's noise team reported feeling unsafe entering the venue to investigate complaints. This raises concerns about enforceability and cooperation if a similar operating model returns. Licences can only be granted where conditions are realistically enforceable. Given the history at this address, that threshold has not been met.

7. Residents want well-run local businesses — but not these hours at this site Residents are not opposed to restaurants, hospitality or cultural activity. A food-led venue closing around 22:30–23:00 would be consistent with the area and would not attract strong objection. The issues relate specifically to:

- the very late hours
- the alcohol-led model
- the history of crime and disorder
- the continuity of the operator
- and the vulnerability of nearby residents

8. Noise levels cannot be mitigated due to proximity to homes Previous operators attempted different measures to reduce noise breakout, including makeshift window coverings and temporary insulation. None were effective. The building's structure and its proximity to residential windows make noise control impossible.

Bass vibration, crowd noise, door activity, taxi engines and groups gathering outside carry directly into homes opposite. The physical design and location of the premises make disturbance unavoidable at the hours requested.

9. The venue has previously attracted serious crime, not minor incidents This address has repeatedly drawn police involvement for violence, disorder and safeguarding concerns. Residents have raised these issues for years. Incidents have included:

- serious assaults
- incidents involving weapons
- drug activity
- and sexual assaults

Residents have repeatedly warned that late-night operation at this premises puts people at risk. Resident Impact Statement

I have lived almost directly opposite for the last ten years and have previously been affected by noise and disturbance, often on weeknights late into the night. This has had an impact on me by disrupting sleep and in turn affected my work. I've witnessed multiple occasions of anti-social behaviour and criminality linked to past venues that has required police attendance.

COMMUNITY RESPONSE

Objection – Application for Premises Licence No. 887243

Dear Southwark Licensing,

We as local residents collectively object to the stated premises licence application. The application remains incompatible with the Licensing Objectives and with the Council's Licensing Policy, especially given the vulnerability of residents directly opposite and the long, documented history of problems connected to both the premises and the operator involved.

1. Safeguarding risks to vulnerable residents directly opposite the premises The venue sits directly opposite multiple residential blocks, including John Penry House, which provides accommodation for older and vulnerable adults. Residents there require consistent and predictable night-time conditions. The application seeks a closing time that reaches into the early hours, including on working days. Alcohol-led activity, late dispersal, noise and increased footfall at those hours are directly at odds with the needs of a residential and vulnerable population.

Southwark has safeguarding responsibilities toward residents in supported accommodation. Approving a late-night alcohol and entertainment licence at this location would introduce foreseeable risks to wellbeing, sleep, and personal safety.

2. The surrounding community includes families, children, carers and shift workers Directly opposite and around the premises are high-density residential blocks with:

- families with young children
- early-start workers
- elderly residents

- individuals previously affected by noise and nuisance from this address Children use nearby bus stops early in the morning. Very late-night alcohol-led dispersal increases the likelihood of noise, litter and disturbance only hours before school and work traffic begins. The character of the area is residential and sensitive.

The presence of shops or restaurants on the main road is not comparable. Ordinary businesses do not generate hundreds of people leaving a late-night venue, with associated alcohol use, drug use and disorder.

3. The premises and the operator have a documented history of serious issues at this address Southwark's Licensing Policy states that the past compliance history of both the premises and the management is relevant to decision-making. Both matter here.

This premises has previously been associated with:

- repeated licensing interventions
- suspensions
- noise problems
- serious disorder
- and licence revocation

These were not isolated events but long-running issues that required formal action.

The current applicant company's director, Mr. Eric Doe, previously operated premises at this same address during periods when these problems occurred. This raises concerns about continuity of management. The application does not demonstrate any change in approach, structure or oversight that would reduce risk. A return to late-night operation under the same individual increases the likelihood of repeated harm.

The applicant's own submitted conditions include a provision stating that "Mr. Eric Doe... shall have no involvement in the operation of the premises whatsoever and shall be permanently excluded from the premises." The contradiction is clear: the director of the applicant company is the same individual the submitted conditions state must be excluded. This raises concerns about accuracy, credibility and workability, and shows that the operating schedule has not been properly reviewed or tailored to this application.

4. The operating model indicates nightclub-style activity, not a restaurant Although described as a "restaurant and lounge," the operating schedule requests:

- alcohol service until 03:00
- closing at 03:30
- amplified and recorded music
- SIA door supervisors
- body-worn cameras
- off-sales
- large private events

These are features of an alcohol-led late-night venue, not a food-led premises. Previous operators at this address used similar descriptions but operated as nightclubs. The Committee should consider the realistic use of the premises based on the hours and conditions requested.

5. The location is structurally unsuitable for late-night dispersal The entrance directly faces homes. There is no buffer zone, no set-back and no safe dispersal route. Patrons inevitably spill into residential walkways, bus stops and the entrances of neighbouring blocks.

Late-night taxis, smoking areas, queues, noise breakout and groups congregating outside are unavoidable outcomes of the hours sought. Food vendors regularly appear to serve intoxicated patrons and end up operating outside residential buildings. The physical layout and proximity to homes make this site unsuitable for late-night operation, regardless of conditions offered.

6. Enforcement difficulties have occurred at this address previously Council teams have had to intervene repeatedly at this premises. There were occasions where engagement with management was challenging during late-night operation, and Southwark's noise team reported feeling unsafe entering the venue to investigate complaints. This raises concerns about enforceability and cooperation if a similar operating model returns. Licences can only be granted where conditions are realistically enforceable. Given the history at this address, that threshold has not been met.

7. Residents want well-run local businesses — but not these hours at this site Residents are not opposed to restaurants, hospitality or cultural activity.
