

Meeting Name:	Overview and Scrutiny Committee
Date:	20 January 2026
Report title:	Delivering Southwark 2030 - Goal 7: 'A Well-run Council' Q2 2025/26 Performance update
Ward(s) or groups affected:	All
Classification:	Open
Reason for lateness (if applicable):	N/A
From:	Assistant Chief Executive, Strategy and Communities

Performance against Southwark 2030 Delivery Plan Goal 7: 'A Well-run Council'

RECOMMENDATION(S)

1. Overview and Scrutiny Committee are asked to:
 - Note the council's progress on delivering the Creating Good Lives Together: Southwark 2030 Delivery Plan goal of being a well-run council.
 - Note the wider insight from the council's resident insight and staff surveys that support our goal of being a well-run council.

BACKGROUND INFORMATION

2. The Creating Good Lives Together: Southwark 2030 Delivery Plan for 2025/26 was agreed at Cabinet in February 2025, following on from the agreement of the Southwark 2030 Strategy at Council Assembly in November 2024.
3. This report seeks to provide assurance to the Overview & Scrutiny committee on Southwark's performance against the internal-facing council goal of 'a well-run council,' of the Council Delivery Plan; providing a more in-depth view of the commitments under this goal.

KEY ISSUES FOR CONSIDERATION

4. The Council Delivery Plan defines a well-run council as one that leads by example to deliver high-quality, accessible services that meet the needs of residents.
5. This goal is fundamental to ensuring the achievement of our Southwark 2030 vision, where we can build a fair, green and safe Southwark, where everyone can live a good life as part of a strong community. The Council Delivery Plan states that 'Being a well-run council requires a relentless focus on value for money, ensuring every pound spent delivers maximum benefit for our communities. It also means understanding and responding to the diverse needs of residents, working in partnership with communities, breaking down barriers to access, and allocating resources fairly to those who need them most.'

6. Our progress against the commitments under this goal is outlined the Council Delivery Plan Monitoring Report, which highlights progress in delivery as at the end of Q2 2025/26 (end of September 2025). As reporting is completed at the end of each quarter, this will mean that additional delivery actions have been completed since the data was captured, and more recent information may be known to the recipients of this report.
7. This report also captures resident satisfaction and perceptions of council performance from the council's Resident Insight Survey programme and staff feedback from the 2024 staff survey.
8. Overall, these sources indicate that Southwark is broadly a well-run council; we are on track to deliver the specific well-run council deliverables within the Council Delivery Plan, we experience relatively high rates of resident satisfaction, and good levels of staff engagement in comparison to other boroughs.

Corporate Delivery Plan Monitoring Report

9. Delivery against the Well-Run Council goal remains strong, providing a high level of assurance on overall progress and the council's capacity to deliver against its priorities.

Total of Well-Run Council commitments	Delivered	On Track	In Progress	At Risk
13	1	10	2	0

10. Commitments in this goal cover a broad range of key priorities for effective organisational performance, including our approach to community engagement and neighbourhood empowerment, more effective strategic partnership working with the voluntary and community sector, our work as the Borough of Sanctuary, and improving resident experience in accessing council services. Many of these commitments are on track, demonstrating sustained progress in strengthening partnership working, co-production and inclusion across the borough. Operational service improvement commitments continue to progress, with some improvements in contact centre responsiveness, the expansion of our digital service provision, and delivery of the Resident Experience Plan now moving into implementation.
11. Environmental and operational commitments, including delivery of the Streets Transformation programme and improving recycling rates remain on track. While recycling performance dipped in Q2 due to increased contamination (down slightly to 34.4% from 36% in Q1). This is being investigated and does not currently present a risk to overall delivery.
12. Foundations for long-term value for money and sustainability continue to be strengthened, with progress on workforce diversity at senior levels, delivery of the corporate estate programme, and significant reductions in the pension fund's carbon intensity.
13. The table below provides an update on performance against the 13 commitments within the Well-Run Council goal of the Corporate Delivery Plan, highlighting current delivery status and areas of progress.

Table 1: Corporate Delivery Plan Monitoring Report

Commitment	This year, we will....	Q2 commentary	Status
CDP Ref 103 Working with our diverse communities to design the services we provide and support people to deliver for their community, setting out our approach in a new community engagement framework developed with our communities	Begin to co-produce a new community engagement framework with our communities	We are strengthening community engagement by embedding consistent standards and support for officers, including training on the new Engagement Hub. Work continues to strengthen community engagement across the council through practical programmes and partnership working. This includes supporting ongoing community involvement in the development of the Centre for Black African and Caribbean Elders, and working with faith groups to co-design next year's Southwark Faith Conference. The Age-Friendly Southwark initiative has now been agreed by Cabinet, establishing a cross-council and community-led approach to engagement with older residents. The Engagement Hub continues to be embedded as a central tool for inclusive participation, helping residents to shape local priorities. This work will feature in the learning to co-produce a new community engagement framework, which will be taken forward in summer 2026.	On Track
CDP Ref 104 Strengthening how the council works with the community in our neighbourhoods to empower residents to shape the places they live in	Work with residents to co-produce a Community Plan for each of our ten Neighbourhoods that sets out the priorities for each neighbourhood, focused on the goals of Southwark 2030	The Neighbourhoods programme was launched in July 2025 to support a bold new way of working with residents, one that puts neighbourhoods and the people of Southwark at the heart of local decision-making, strengthening how we work with local communities and empower residents to shape the places they live in. The ten neighbourhoods are: • Borough & London Bridge • Walworth • Peckham • Camberwell • Dulwich • East Dulwich • Nunhead & Peckham Rye • Old Kent Road • Bermondsey • Rotherhithe The programme introduced 10 new neighbourhoods across the borough in summer 2025, and launched through 10 community meetings held across local neighbourhoods with over 450	On Track

Commitment	This year, we will....	Q2 commentary	Status
		residents participating. This co-production work is helping to shape community plans, which will set out what is important to local people, what needs improving, what support and services, the area needs, and where future funding should go. Engagement efforts continued throughout the summer and into the autumn to increase resident participation, working with local community groups, attending community events, and promoting online surveys. The new Neighbourhoods Grants scheme launched a £3.3 million programme of neighbourhood funding in September 2025. For the first time, residents and local organisations were able to access funding through one simple application process, including: • £1.88 million for Cleaner Greener Safer improvements • £630,000 for the Neighbourhoods Fund • £800,000 for Devolved Highways projects Dedicated neighbourhood newsletters for each of the 10 neighbourhoods were to be launched in December 2025, ensuring timely up-to-date information on local priorities and issues for residents across neighbourhood areas on a quarterly basis.	

Commitment	This year, we will....	Q2 commentary	Status
CDP Ref 105 Develop a council plan in response to the Southwark state of the voluntary and community sector report	Begin developing a council-wide narrative and response to the State of the Voluntary and Community Sector report	The Southwark State of the Sector report recommended improving funding processes, enhancing access to affordable premises for voluntary groups, and fostering stronger relationships between the voluntary sector, funders, and public bodies through collaborative commissioning and business engagement. We are committed to understand how we are funding the sector as a whole council. While we are the largest VCS investor in the borough, spending over £28.5m in 2024/25, we know that there is currently no overarching thematic governance across the council, leading to fragmented and siloed communication, grant giving and commissioning. The first step in this process has been the establishment of a cross-council VCS strategic funding group to guide our strategic intent and partnership working with the sector, which will prioritise: • Supporting and sustaining the diversity, resilience and adaptability of the sector • Embedding strategic oversight and coordination to respond to the challenges, needs and opportunities in the sector and for communities • Strengthening trust and transparency. This activity runs in parallel to our continuous improvement work to understand from our existing commissioning and grant giving activity. The Community and VCS Engagement Team is working with the Institute of Voluntary Action Research to test how effectively the Common Purpose grants programme meets objectives around openness and transparency. We are also working with the Social Innovation Partnership to evaluate the £389k Equalities Grants programme. The commissioning pipeline includes Warm Hubs funding for 2025/26 (from October 2025) and an extension of the Healthwatch grant (December 2025). Commissioning priorities include ensuring access to community legal advice for residents facing financial hardship, and developing a commissioning plan by March 2026 that will set out funding criteria, grant duration and equality requirements. It will aim to create the right balance between longer-term core funding and support for newer organisations to drive innovation.	On Track

Commitment	This year, we will....	Q2 commentary	Status
CDP Ref 106 Working with all of our partners we will deliver our Borough of Sanctuary action plan to ensure our migrant, asylum seeker and refugee communities can lead good lives in our borough	Deliver our Borough of Sanctuary action plan Integrate our work with our migrant, asylum seeker and refugee communities with our whole-council approaches to community engagement	Over the past year, Southwark has completed its first Annual Progress Review as a recognised Borough of Sanctuary, marking a strong start in embedding sanctuary principles across the borough. The review highlights significant achievements and strong partnership working to build a Sanctuary Ecosystem supporting refugees, asylum seekers and vulnerable migrants. Key achievements include: • Strengthened partnerships across the VCS, legal advice sector, and libraries and schools • Delivery of eVisa workshops and outreach to support the transition to the digital immigration system • Establishment of an Experts by Experience Panel to embed lived experience in policy and service design • Recruitment of specialist resettlement workers; and the launch of a Housing Surgery to address accommodation and welfare needs, now being recognised as best practice by other boroughs. • The first year of Borough of Sanctuary funding has been distributed to VCS partners, alongside the development of a more collaborative and sustainable grants model. Looking ahead to year two, a Borough of Sanctuary Action Planning Meeting will review progress, refresh priorities and co-produce future actions, with a continued focus on lived experience, partnership working and inclusion. The Ukraine response is currently supporting 202 individuals across 127 households, with joint work underway to support move-on from temporary accommodation. Afghan resettlement numbers have reduced to eight households, with new Local Authority Housing Fund homes secured, including a five-bedroom property expected shortly. Around 600 asylum seekers are currently in accommodation, with targeted support provided to households facing eviction, supported through the ongoing Housing Surgery in partnership with legal and specialist advice providers.	On Track

Commitment	This year, we will....	Q2 commentary	Status
CDP Ref 107 Ensure the council's workforce at every level is representative of Southwark's population.	Ensure that more senior management roles are filled by ethnically diverse employees, so that we work towards proportionate representation of Southwark's Black, Asian and minority ethnic population by 2030	Since 31 March 2022, the percentage of senior management roles filled by ethnically diverse employees has increased from 24.8% to 35.0%. We are currently slightly short of our target, which is 35.4%. Action taken to continue improving representation in senior management roles includes: the introduction of Southwark Stands Together workforce dashboards for each department, and a range of recruitment campaigns designed to fill roles that are vacant or occupied by interims. A new action plan to further improve the ethnic diversity of senior managers is under development and will be presented to CMT in Q3 25/26.	In Progress
CDP Ref 108 <i>Keep our streets and estates clean, delivering our Streets Transformation programme to tackle graffiti and fly tipping hotspots in our estates and town centres.</i>	Deliver our Streets Transformation programme to: 1. reduce the level of graffiti focussing on known hotspot locations 2. reduce the level of fly-tipping focussing on hotspot locations on 7 estates and in 7 streets 3. improve cleanliness at 7 locations that are affected by waste from flats above shops (FLASH) 4. improve waste storage arrangements on 7 estates	The Programme is on track to achieve all of the stated 'Commitments' for 2025/26. Progress in Q2 included successful: • Completion of graffiti and fly posting 'blitz' clean on Camberwell Church Street and relocation of 'blitz' clean to next focus on Peckham town centre; • Adoption of fly tipping 'crime tape/ stickers' to support behaviour change; • Completion of consolidated fly tipping on estates action plan for 7 trial estates and sign off; • Procurement and deployment of 5 redeployable CCTV cameras; and • Completing governance for General Fund capital investment in waste management infrastructure improvements on 7 trial estates; • Installation of food waste containers for flats above shops, properties without storage for bins and small blocks is progressing. For our fly tipping and graffiti metrics, the % of fly-tipping removed within 24 hours of being reported is at 72%, and the % of graffiti removed within 5 days of being reported is at 95%. Fly tipping performance variance is attributable to the following factors: • Monthly service requests have increased significantly from c600 in 2024/25 and to c800 in 2025/26. • Change in service request system management introduced from April 2025 is continuing to result in some requests not being closed on time, resulting in them missing target. A recommended change to the fly tipping performance standard from 24-hours to 48-hours was approved, which will come into effect from Q3. Additionally, the metric for graffiti removal has been amended as follows for 2025/26: - 'Offensive' graffiti 24 hours (previously 4 hours); and 'Non-offensive' graffiti 5 days (previously 24 hours)	On Track

Commitment	This year, we will....	Q2 commentary	Status
CDP Ref 109 Ensure Southwark has one of the highest recycling rates in inner London with an easy to-use food waste service	Remain the leading London borough for household waste recycled, composted and reused by increasing the recycling capacity on our estates and making it easy to recycle in Southwark	Recycling performance for Q2 is forecast at 34.4%. Reported contamination increased significantly in Q2 compared to Q1, which is likely to have contributed to the decline in performance. This will be investigated to understand the underlying causes and to identify the actions required to address the issue.	On Track
CDP Ref 110 <i>Continue to improve our contact centre, improving call waiting times and customer responsiveness</i>	Demonstrate that our call centre is responsive by further improving call waiting times so that at least 70% of all contact centres calls are answered within 5 minutes, decreasing the proportion of calls that are avoidable contacts, and increase satisfaction with the call centre by 10%.	Within Q2 2025/26, 77% of all contact centre calls were answered within 5 minutes, an improvement by 3% from Q1 2025/26 (74%). The percentage of avoidable contacts for Q2 2025/26 is 27%, higher than the limit of 25%. This figure was a marginal improvement from Q1 FY 2024/25 (27.5%). The above-target figure of repeat calls were due to a large volume of calls chasing outstanding repairs. In terms of call centre satisfaction, the contact centre remains committed to service improvement with the recent telephony upgrade in April 2025. The new system will be utilised to monitor satisfaction with calls and will be implemented in the latter half of this financial year.	In Progress
CDP Ref 111 Increase the number of council services which are available digitally so residents can access them at any time of the day and receive automatic updates	Through our Customer Experience plan, we will enhance our digital services while ensuring digital inclusion for all residents.	Our Resident Experience Plan sets out a bold vision to transform the way residents interact with us and our services. We want to ensure that every contact, whether online, by phone, or in person is always high-quality, respectful and responsive. Through our digital strategy, our vision is that Southwark is one of the best connected and leading digital boroughs in London, offering greater digital inclusivity alongside the transformation of the way residents interact with the council. Some key developments in improving the availability of our digital service provision include: • The Leaseholders Portal is now live and delivering value to our residents. The portal enables leaseholders to self-serve and view a detailed breakdown of their charges, including estate-level and property-specific costs. This project supports the strategic goal of “decent homes for all” and contributes to operational efficiency. • The AI BSL Translation Pilot is progressing well. This project ensures our Deaf residents can engage with council content in their preferred language, removing barriers to information and participation.	On Track

Commitment	This year, we will....	Q2 commentary	Status
		The Digital Directory of Services (Alpha) is laying the groundwork for a unified, authoritative source of council service information. By reducing fragmentation and improving discoverability, it supports more efficient service delivery and better outcomes for residents. The aligns with the strategic goals of “a strong and fair economy” and “a healthy environment.”	
CDP Ref 112 Improve the council’s complaints service so complaints are resolved promptly and fairly	Ensure that more Stage 1 complaints are responded to within 10 working days; 15 days for all Stage 2 complaints. We will also seek to influence the factors that cause complaints. In the second half of the year, work to implement a new Council-wide Customer Experience Plan will commence. When fully implemented (by 2030), we expect to see a 30% reduction in the total number of complaints	The Resident Experience Plan 2025 – 2030 was endorsed by Cabinet in September 2025. The focus is to ensure residents receive a high quality, consistent service when interacting with our services, ensuring they are accessible. The REP team have been engaging with the relevant services involved to ensure awareness of the Plan, as well as creating the governance structure to ensure effective delivery which is currently on track. We have made significant progress by increasing the percentage of section 1 resident complaints responded to within timescale from 33% at the start of Q1 to 83% in Q2. The establishment of a dedicated stage 1 housing complaints team and a concerted operational drive has cleared the backlog of stage 1 housing complaints down to zero, making a significant contribution to overall complaints performance. Over the same period, the percentage of section 2 complaints responded to within timescale from 29% to 52%.	On Track

Commitment	This year, we will....	Q2 commentary	Status
CDP Ref 113 <i>Further strengthen the council's approach to procurement, increasing social value for residents for each pound we spend, including continuing to lead in bringing council services in house where feasible and doing so delivers better value for our residents.</i>	<i>Support the development of Southwark's commercial framework</i> <i>Update the Council's Procurement framework and gain approval for a new Southwark Council Social Value Framework.</i> <i>Support the delivery of best value, and commercial considerations and local economy growth including via in-sourcing, in light of the Procurement Act.</i>	The Procurement Advice Team are supporting the development of Southwark's commercial framework as part of our Future Southwark transformation programme. A refreshed Southwark 2030 Procurement Framework and Social Value Framework were approved by Cabinet in June 2025. The frameworks, together with the function of the procurement team, aims to support departments to continue to deliver contracts that offer best value, while being aware of best practice and legislation.	Delivered

Commitment	This year, we will....	Q2 commentary	Status
CDP Ref 114 Increase the value for money of our council buildings, reviewing our corporate estate to make sure we have the right buildings to deliver the services our residents need	Review our corporate estate to make sure we have the right buildings to deliver the services our residents need Complete the relocation of Children's Services to Queen's Road, CCTV to Tooley Street and the call centre to Bournemouth Road Complete works at Sandgate Street and Bournemouth Road to realise value for money in the use of council buildings	Relocation of children's services The delivery date for this project has been revised from December 2025 to March 2026. This change is the result of: (1) additional time spent finalising the accommodation strategy for adult and children's services, and (2) an extended period of due diligence on the contract for enabling works at Queens Road 3. The Gateway 2 report authorising appointment of a contractor is on track to be approved in early November. Project delivery is on track for completion by March 2026. Relocation of CCTV This project remains on track. The first phase of works, relocation of the Opposition Office, will commence in early November. Relocation of the contact centre This project remains on track. The Gateway 2 report authorising appointment of a contractor is on track to be approved in Q4 25/26. Sandgate St welfare facility This project remains on track. The Gateway 2 report authorising appointment of a contractor is on track to be approved in early November. The project delivery date has been revised from Q3 25/26 to Q4 25/26. Bournemouth Road reception This project remains on track. The Gateway 2 report authorising appointment of a contractor is on track to be approved in early October. The project delivery date has been revised from Q3 25/26 to Q4 25/26.	On Track

Commitment	This year, we will....	Q2 commentary	Status
CDP Ref 115 Make the council's pension fund zero carbon by 2030 at the latest and earlier if more zero carbon funds become available sooner	Continue improvements in our carbon footprint reduction, and formally review all investments in the council's pension fund to help shape our future LGPS portfolio pools, in line with central government changes	In Q2, there were 40.6 tonnes of CO2 emitted per £m revenue of portfolio companies. This number represents an 81% reduction in the weighted carbon intensity (Scope 1 & Scope 2) of the Fund compared to Sept 2017 baseline. The calculation is based on data from fund managers and third-party data provider and includes use of some assumptions/proxy numbers. The Fund continues to engage with fund managers to better measure the carbon footprint of the underlying assets, including Scope 3 emissions of the portfolio. There have been no new investments during Q2 FY 25-26 and allocation to all asset classes in the portfolio has remained broadly constant compared to Q1. Any marginal changes in the overall allocation is due to market movements. Based on results of the ongoing triennial valuation and subsequent review of the Investment Strategy, the Fund will explore any additional decarbonisation opportunities across all asset classes. Following the pooling mandate from Fit for Future regulation, the Fund will also need to consider appropriate product offerings from London CIV going forward.	On Track

Resident satisfaction and perceptions of council services

14. Resident perceptions provide an important indicator of progress against the Well-Run Council goal. Since summer 2024, the council has worked with a market research agency to conduct a demographically representative Resident Insight Survey, enabling us to better explore and track the views, experiences and needs of Southwark residents. Representative surveys provide accurate, reliable and robust data that we can compare over time and can say with confidence that it reflects the sentiment of the borough.
15. We have completed three waves of the Resident Insight Survey so far, with respondents chosen to be representative of the borough in terms of age, gender, ethnicity, economic status (i.e. whether economically active or inactive), disability, and type of property ownership/tenancy, speaking to over 800 residents in each wave.
16. Overall, the findings show that Southwark residents continue to have exceptionally levels of satisfaction with their local area. The majority of key metrics have improved in Wave 3 and Southwark outperforms the London benchmarks for all major measures, which are set out below:

Key performance indicator	Wave 3 2025	Wave 2 2025	Wave 1 2024	LGA benchmark (October 2024)	London benchmark
Satisfaction with the council	70%	69%	71%	56%	60%
Value for money	55%	57%	56%	36%	47%
Feeling informed	71%	67%	64%	47%	54%
Satisfaction with the local area	91%	88%	88%	74%	79%
Trust in the council	72%	68%	72%	50%	66%
Acting on residents' concerns	53%	55%	57%	53%	N/A

Key areas of note include:

- Overall satisfaction with the council remains strong, with 70% of residents reporting they are very or fairly satisfied, exceeding the London benchmark of 60%.

- Perceptions of value for money are comparatively positive, with 55% of residents agreeing the Council provides good value for money, compared with a London benchmark of 47%.
- Resident satisfaction with Southwark as a place to live is notably high, at 91%, significantly above the London benchmark of 79%.
- Key drivers of satisfaction relate closely to our commitments to being a well-run council, including trust in the Council, perceptions of value for money, satisfaction with street cleanliness, and residents' interest in being involved in local decision-making.
- Residents also report positive perceptions of progress against wider Southwark 2030 goals, particularly in relation to building a healthy environment (72%) and staying well (68%).

Area for continued focus:

- While overall perceptions of value for money are positive, there is an opportunity to strengthen communication about how Council Tax is invested and the tangible benefits it delivers, as some residents report limited visibility of how this funding supports the services they rely upon.

Staff experiences of working at Southwark Council

17. At the council, we are committed to ensuring we have a workforce prepared to deliver our Southwark 2030 vision, meet residents' needs, and receive the support and encouragement to continue their professional development. Our annual Express Yourself staff survey helps us to continuously improve experiences of working for the council, understanding areas of strength and for development. Since 2023, we have carried out an annual staff survey, with 2024's survey receiving 2923 responses out of 4859 employees, representing a 60% response rate. Across all respondents, our engagement score was 79%, with almost 4 in 5 respondents saying they are well-engaged members of staff and care about the future of the council, and 73% of staff finding their role fulfilling. The 2025 staff survey was conducted throughout November 2025, with results due to be reported later this year.

Areas of progress

- 90% care about the future of Southwark council
- 85% are clear about what they are expected to achieve in their jobs (higher than other local authorities which benchmark at 83%)
- 80% colleagues help and support each other
- 83% of staff feel their line managers treats them fairly and with respect (higher than other local authorities which benchmark at 81%)

Areas of continued focus

- The percentage of staff who feel senior managers make the effort to listen has improved by 5% since 2023 to 48%, which is higher by 4% than the local authority benchmark. The staff survey analysis report produced comprehensive recommendations to continue to build on improvements, as

well as 4 tiers of action planning (covering whole council, departmental, divisional, and local team levels).

18. In addition to positive staff survey results, we have successfully reduced the number of agency workers by almost 10%, from 811 to 731 during Q2, and will continue to prioritise this trajectory to achieve further reductions.
19. Southwark also has a low staff turnover rate. In Q2, 8.6% of employees had left within the last 12 months, which broadly suggests the council's workforce is stable, experienced, and loyal.
20. Whilst Southwark does have a lower proportion of women in its workforce and a large headcount (5167 in Q2), this likely reflects the council's commitment to in-house service delivery, particularly in areas like repairs and maintenance services, where many other councils outsource the delivery of these functions.

Summary

21. Overall Southwark continues to demonstrate strong progress towards its Southwark 2030 goal of being a 'well-run council', leading by example to deliver high-quality, accessible services that meet residents' needs.
22. Performance monitoring shows that delivery against this goal remains strong, with the majority of the 13 commitments within the Corporate Delivery Plan on track or already delivered, providing assurance on the council's capacity to manage resources effectively and deliver against its priorities.
23. This is reinforced by wider insight from resident and staff surveys, which indicate that Southwark is performing well in comparison with its local authority peers. Residents report higher levels of satisfaction with how the council is run and more positive perceptions of value for money than the London benchmark, alongside high satisfaction with Southwark as a place to live.
24. Staff feedback similarly points to a well-functioning organisation, with higher levels of employee engagement, clearer role expectations and more positive perceptions of line management than comparator authorities.
25. Looking ahead, the council recognises that sustaining and strengthening what it means to be a well-run council will require continued evolution in the context of ongoing financial pressures, rising demand and increasing complexity in residents' needs.
26. Work is currently underway on developing options for the delivery of the council's future MTFS, including opportunities to increase operational efficiency, enhance digital services and improve resident experience.
27. This aims to ensure the council continues to deliver against its goal of being a well-run organisation that is resilient, responsive and well-placed to deliver for residents in a challenging financial and operating environment.
